(54) CHEMICALLY TREATING AGENT FOR HAIR

(57)Abstract:

PURPOSE: To obtain the titled treating agent capable of effectively preventing inflammation on scalp, fallen hair and damage of hair and of providing hair with good touch, containing a methylsiloxane polymer having a polymerization degree in a specific range.

CONSTITUTION: The titled treating agent containing 0.1W20wt.% preferably 0.3W15wt.% methylsiloxane polymer having $\geq 1,000$, preferably 3,000W10,000 polymerization degree. Further addition of a methylsiloxane and/or cyclic methylsiloxane having low polymerization degree shows more secure improved effects and blending of 0.1W20wt.%, especially 0.5W5wt.% cationic cellulose and/or polyvinyl pyrrolidone are further more effective. Addition of odd-numbered carbon chain fatty acid derivative and/or odd-numbered carbon chain alcohol derivative is effective for suppressing inflammation of scalp. The treating agent is prepared as permanent wave agent, hair coloring agent or bleaching agent and used.
